PROFILE

A very enthusiastic, productive and result oriented, hardworking and reliable 3rd year B.Sc student at Ryerson University, Toronto. I am skilled in electrical wiring, various programming languages, customer service relations, team building, operations and support services. I am expert in use of personal computer operations and have experience with HTML5, CSS, Javascript, Java and C#. Dedication, commitment and fast learning are my personal strengths. I have experience and adept in delivering work in an organized manner with accuracy and perfection.

EXPERIENCE

Electronics Assembler - Celestica May 2019 - CURRENT

- Performed PTH (Pin through hole) component insertion and other manual assembly operations prior to the soldering process on printed circuit boards.
- Calibrated mechanical assembly tools used in the assembly process.
- Performed variety of mechanical and electronic assembly operations based on IPC and customer specifications.
-

Electrical Assembler- AAA Canada/ Bombardier Aerospace January 2017- September 2018

- Performed electrical rework for the Bombardier Global 7500 program.
- Executed the installation, mounting and fixing of electrical components on different media (mechanical chassis, chassis controls and electrical panels) following the technical documentation, mechanical drawings and electrical schematics.
- Performed electrical connections: stripping, crimping, soldering, assembling of connectors and lacing cables.
- Carried out the installation and maintenance of the equipment.
- Recorded measurements and characteristics (trials, testing) and report any irregularities.
- Verified the compliance of the work with the generic and specific standards defined in the technical work documentation.

PC Building – Freelance September 2015- January 2017

- Executed meetings with clients and gave them information of components based on their budget.
- Selected PC components for clients which are within the budget and also fit the client's needs (gaming, school work, etc).
- Assembled the computer components, as well as installing and configuring Windows, and Anti-virus on the PC in a timely manner.

EDUCATION

1. Computer Science Student (3rd Year)- Ryerson University
2. Bombardier's Basic Technical Training
3. Wiring design and testing Course
4. Harness use and Inspection Course
5. 5S Organizational Housekeeping and Development Course
